

MAKING THE HAND BONE MITTEN

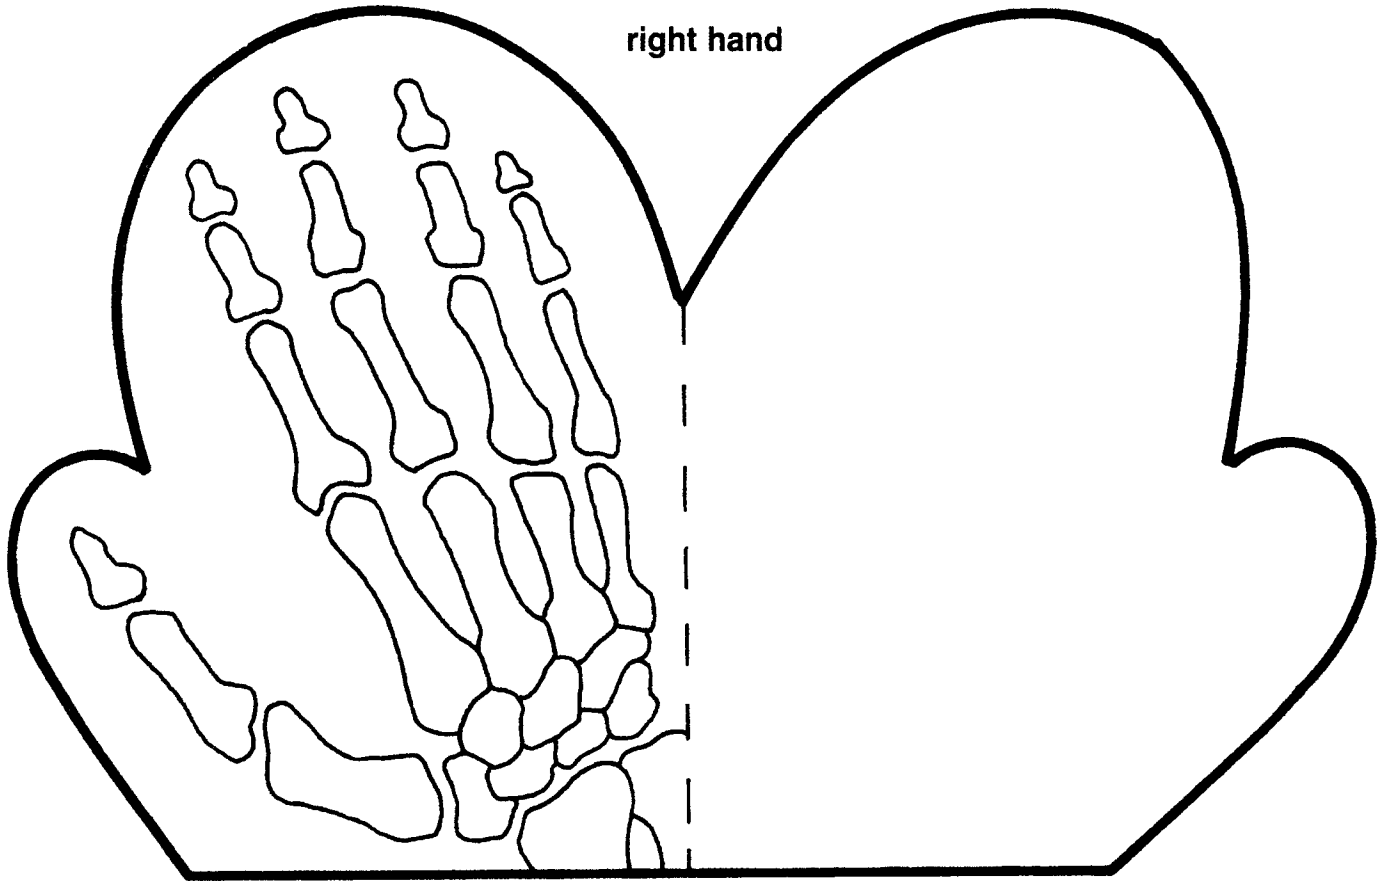

1. Reproduce the hand bone mittens.
2. Fold along the outside edge and staple the inside edges together.
3. The child can wear the bones like a mitten.

More Options

1. Label each of the bones in the hand. Think about what your hand would look like and how it might operate differently if you removed just one bone.
2. Color around all the bones so you can see the white bones more clearly.
3. For bigger kids, enlarge the bone mitten pattern so it will fit larger hands.
