

"guess who?" book

\* Variation on the Fact Book: Let each child choose an animal to color and cut out. Instruct him to write several facts on a page of storybook-style lined paper without naming the animal. Laminate the page and the animal. Apply self-adhesive Velcro (TM) dots to the pages and animals, as shown. Bind the pages to make a book and store the animals in a resealable plastic bag. A child reads each page, then chooses the appropriate animal for the page and sticks the animal to the Velcro (TM) dot on the page.

### Making a Large Shape Book

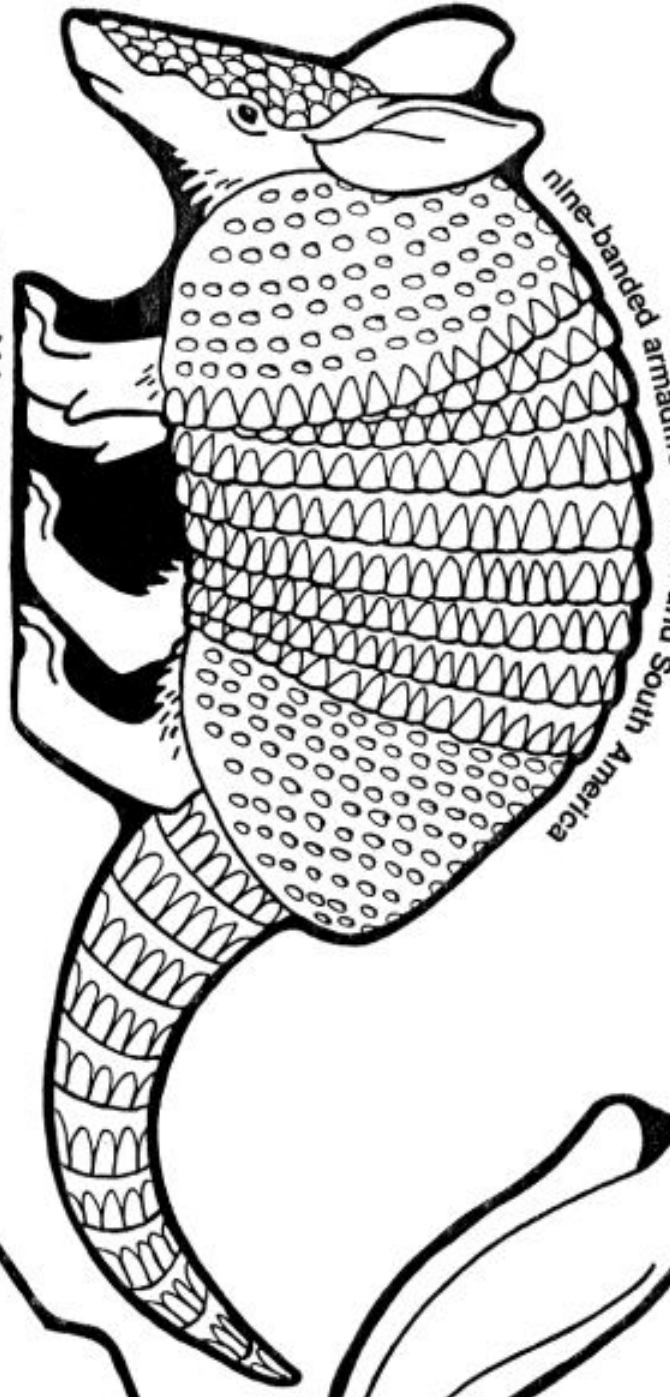

1. Reproduce a large animal pattern (like the camel) or enlarge any of the smaller animal patterns to 11"X17" size and reproduce one pattern for each child. Let the children color and decorate their animals. These will be the covers of the books.
2. Let the children use their covers to trace and cut out several pages of lined storybook paper.
3. Let the children write their stories or reports on the lined paper shapes.
4. Gather the pages, position the cover on top, and staple together on the left side.

large shape books

desert hedgehog - North Africa and Asia

nine-banded armadillo - North and South America

antelope jackrabbit - North America

Jerboa - North Africa and Asia

crested porcupine -  
Middle East and India
